

Passage-grounded framework assessment

Counts preserve their units: cases, submitted passages, and dimension-level assessments are linked but are not interchangeable.

A Submitted-evidence coverage by pathway

B Traceability checks

79 / 79

non-missing assessments cited
a submitted source passage

Offline deterministic evaluator · no LLM calls

Passing establishes specification conformance only.

Raw counts are printed inside bars. Pathways activate different numbers of dimensions (Human 5, ICT 6, AI 11), so distributions are not comparative accuracy scores.

Documented Partial Missing
